

National Centre SOLARIS

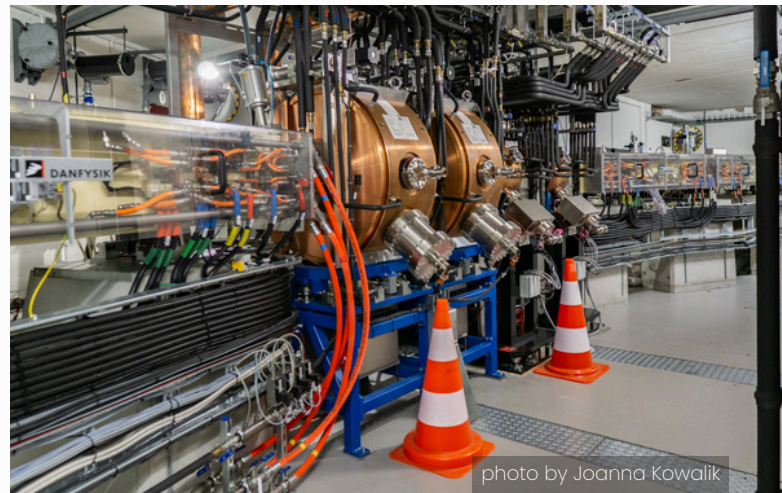

Basics of Accelerator Physics

free of charge course for PhD students
08th Oct. 2026 - 28th Jan. 2027
online every Thursday between 08:30 and 10:00

Objectives of the lecture:

Learning about particle accelerators, especially about physics standing behind their operation, used conventions and nomenclature, and examples of application in science and industry. Acquiring the ability to use common computer tools of accelerator design and development. Preparing to work with particle accelerators.

Registration deadline 5th of October
