**About the faculty**

The mission of the Faculty of Economics and Sociology is to create social processes by generating and disseminating knowledge that ensures the development of students (by caring for didactic reliability and creating an attractive space for studying), employees of the faculty (by striving for scientific excellence and providing attractive working conditions) and entities operating in its socio-economic environment (through openness to cooperation and exchange of experience).

The faculty specialises in numerous research areas in the field of social sciences, with particular emphasis on the study of the economy and its modelling, finance, real estate markets, as well as sociology and spatial management. Many of these studies cover the issues of transformation of post-industrial cities, including research on social transformations, the development of new, knowledge-intensive branches of the economy, social and spatial inequalities and how to eliminate them, demographic changes and sustainable development.

**CLEARING HOUSE project**

Collaborative Learning in Research, Information-Sharing and Governance on How Urban Forests as Nature-based Solutions Support Sino-European Urban Futures. The project is funded under the Horizon 2020 competition. Its objective is to develop solutions that will increase the resilience of cities to ecological, socio-economic and related to the quality of life challenges, adapted to the needs of cities in Europe and China. Project manager from the University of Lodz: dr hab. Jakub Kronenberg, prof. UL.
IACBE Accreditation

In 2021, our Economics field of study obtained the prestigious American accreditation granted by the leader of accreditation for business education programmes – the International Accreditation Council for Business Education. Accreditation confirms that the University of Lodz meets the requirements such as: efficient functioning, high level of didactics, innovative management, good relations with business and high value of the diploma, which counts on the labour market.

Openness to the local socio-economic environment

Openness to the local socio-economic environment, which is expressed by other significant projects of an application nature, and the participation of the faculty employees in university-wide research structures, such as: University of Lodz Interdisciplinary Centre for Urban Studies, University of Lodz Centre of Migration Studies, University of Lodz Center of Social Innovations, Centre for Data Analysis, Modelling and Computational Sciences (CAMiNO).

Fields of study
