About the faculty

Scientific and research work carried out by the employees of the Faculty of Management of the University of Lodz focuses on the issue defined by the term “Management in a knowledge-based economy”. This choice of specialisation is dictated by the modern business, shaped by the growing role of information and knowledge, i.e. intellectual capital. Research activity of the faculty employees is focused on such issues as: organisational management models and systems, strategic and marketing management, corporate social responsibility, entrepreneurship and innovation. Research and development issues are also related to finance management and accounting, and the adaptation of its methods to the needs of organisation management.

The Faculty of Management offers first- and second-cycle studies, co-creates the University of Lodz Doctoral School of Social Sciences, offers non-degree postgraduate studies and successfully implements training developing business competences in the field of management, finance and accounting. The University of Lodz Faculty of Management is recognised thanks to its outstanding scientific experts, active cooperation with the economic environment, innovative projects as well as entrepreneurial and effective management.

Accreditations and rankings

When it comes to the area of fields of study certification, we cooperate with the following international organisations: ACCA, IACBE, IPMA, CIMA, ELA. The faculty, as the first in Poland, has received the highest distinctive institutional assessment of the Polish Accreditation Committee in the field of social sciences. We have obtained scientific category A as part of the parametric evaluation and our fields of study are highly rated in the rankings.
**Quality of education**

We adjust our offer to the market needs, update curricula and introduce new study programmes. Studies at the Faculty of Management help to acquire managerial qualifications and shape the skills necessary to start, and independently run a business. They also develop the most valued skills in the labour market – analytical thinking, fast learning and independence.

**External cooperation**

We support entrepreneurs and the public sector with our scientific experience. The faculty employees provide advice to institutions subordinate to local and central authorities, co-create Polish legal regulations and cooperate with industry organisations. They also implement various educational initiatives and take part in scientific and industry conferences. The faculty experts share their knowledge as part of comments for the media.
