## XV SCIENTIFIC CONFERENCE MASEP

Measurement and Assessment of Social and Economic Phenomena

### CONFERENCE INFORMATION

XV Jubilee MASEP 2024 Scientific Conference – Measurement and Assessment of Social and Economic Phenomena – will be held in Lodz on 27<sup>th</sup> to 29<sup>th</sup> November, 2024. The conference will provide a forum to exchange views and experiences related to the application of quantitative methods to assess contemporary economic and social issues. At the conference, we will discuss, among others, changes in the geopolitical scene and the growing impact of artificial intelligence on various sectors of the economy, including science, which opens new perspectives and raises questions about the future of our world. The MASEP 2024 conference will be a gathering of academics and practitioners that deal with methodological aspects of social and economic challenges in the modern world, including the functioning of economic sectors, economic activity and the quality of life of the population.

Themed sessions with guest speakers will be an important part of the event and we cordially invite you to organise such sessions. The organisation of a guest thematic session is an opportunity for active participation in determining the directions and areas of scientific discussion conducted as part of the MASEP 2024 conference.

In particular, we are inviting speakers to submit proposals of sessions referring to the areas of this year's MASEP 2024 Conference:

This year's conference focuses on the following issues

- (1) European countries facing the economic and social crisis,
- (2) Sustainable development,
- (3) Innovativeness,
- (4) Artificial Intelligence (AI),
- (5) Labour market,
- (6) Population ageing,
- (7) Food economy.
